

Veranda Flagpole

This highly versatile, durable anodised aluminium pole is made in two pieces for ease of shipping. A bonus function is that the upper portion of the pole is free to spin. This means that the flag is unlikely to wrap around the pole, a common problem with angle mounted flagpoles.

The adjustable cast aluminium wall socket for the pole has 13 positions between horizontal and vertical, and is suitable for fixing to either curved, or flat surfaces, with either screws or strapping. The pole is easily removed for overnight or inclement weather storage.

The Veranda Pole is a serious flagpole, providing a versatile and cost effective wall mounting solution for flag display.

Part number: FP766910 adjustable cast wall bracket

Price: \$22 including GST

Part number: FP766911 25mm spinning pole

Price: \$33 including GST
