Rota-Banner

rotating arm banner poles for flying vertical banners

Rota Banner is a low cost way to fly a banner. The rigid arm keeps the banner deployed when there is no wind. The same fabric is used as for a normal flags therefore the banner behaves like a flag giving lively impression and presenting the artwork in the still wether

3 ways to change the banners

- Elevated platform
- Removing the pole from the socket
- Lowering the pole using the hinge base

These poles are widely used by councils and large venues. They are attractive looking, maintenance free with the following features:

- aluminium pole high tensile aluminium 6351-T6
- natural anodised finish
- Rigid top banner arm that rotates with the wind, holds up the banner when there is no wind
- No ropes or pulleys,.
